How to load T-iX upgrade software

New Currency Series – Bank Notes & Coins

For technical support contact support@cptcash.co.za or 0861 67 4490

The software upgrade is simple and easy to do.

If you have any questions or experience any problems during the upgrade please do not hesitate to contact us on

0861 67 4490

STEP 1

Switch machine off using the power key.

Need more information or assistance, visit our website at www.cptcash.co.za.

STEP 2

Insert the upgrade device provided into the USB-A port (shown below).

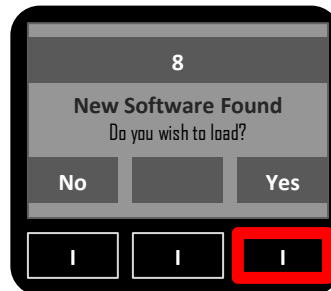

This side facing up

Switch the machine on.

The home screen will appear momentarily and then the following message will appear: **New Software Found. Do you wish to load?'**

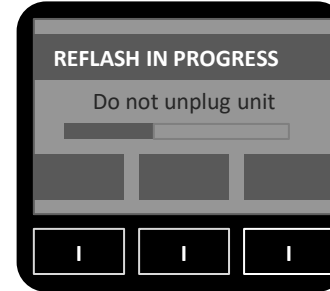

STEP 3

Press the soft key "I" below the Yes to start the upgrade.

STEP 4

REFLASH IN PROGRESS will appear, and the bar will gradually fill up.

Do not unplug the unit. Once the bar has filled up, the screen below will appear. Remove the USB stick out of the port.

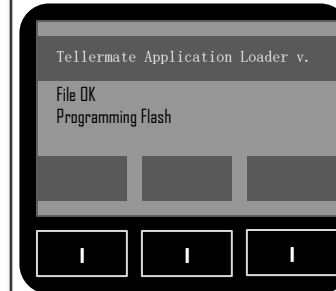

SEE REVERSE FOR SETUP ASSISTANCE

STEP 5

The REFLASH screen will then disappear and a "TellerMate Application Loader" screen will appear.

The bar will fill up and the unit will switch off automatically.

STEP 6

WELL DONE!

Once the unit has switched off your software upgrade is complete.

You can switch the unit back on and continue using your machine.

PLEASE NOTE

Example Note settings:

R10 - current note
R10N - New Series Bank note issued

Example Coins settings

R0.20-current coins in circulation
R0.20M-can count current series & new series coins mixed where number of coins per count don't exceed 6 – 10 coins.
